Summary

I'm a full-stack developer, Flutter developer, an experienced backend developer with DevOps experience and an embedded systems enthusiast. I've been programming for over 9 years and I have experiences in a vast variety of applied computer science fields from web designing down to hardware and low-level programming. I have a set of teamwork skills and I handle work pressure appropriately.

Skills

- Programming languages including: Assembly, C/C++, Dart, Rust, Python, GO, HTML, CSS, JavaScript, TypeScript and SQL.
- Mobile application development with Flutter.
- Knowledge of Firebase services including: Cloud Messaging, Firestore, RealtimeDB and Crashlytics.
- Skills in databases including: MS SQL, PostgreSQL, SQLite, MySQL and MongoDB.
- Backend development with Node.js (Express js).
- Frontend development with Svelte.
- System administration knowledge in Linux (Ubuntu, CentOS, Arch).
- Github Actions CI/CD
- Github Projects for project management
- Familiar with DevOps work with DigitalOcean, and AWS basics.
- System designing and prototyping with Arduino.
- Circuit designing in EAGLE.
- IoT systems designing and development with RaspberryPi and ESP8266.
- Experience in educational robotics kits including REV Robotics, LEGO Mindstrom NXT.

Volunteering Work

- **Computer Science Teacher**
 - Worked at Gifted and Talented Students Schools as a Computer Science teacher
 - Taught History of Computer, Workflow of programs and HTML
 - Taught from 4th to 8th grade
- **Science Secretary at Gifted and Talented Students Union**
 - Made plans and distributed work to teams
 - Prepared scientific content for university level students
 - Established a student fair in Sudan University of Science and Technology
- **Introduced sessions on programming in Mechatronics Engineering Inventors community**
 - Gave introduction to programming
 - Worked with groups to keep track of their progress
- **Introduced sessions on programming to students in Sudan University of Science and Technology**
 - Talked about the role of AI
 - Talked about implementation of AI in real life
- **Introduced sessions on self-learning to students in events**
 - Introduced session to first year students in Human Library event
- **Mentored Team Sudan for FIRST Global Challenge 2019**
 - Established a team of 7 people
 - Supervised 5 students to make a robot
 - Raised funds for the journey
 - Won the outstanding mentor award

Freelancing Commercial Projects

- **Peace Bridge Organization System** - C# .NET Framework
 - o Management system for an organization, features fully system management for the organization.
- **Dr. Nazar Clinic** - C# .NET Framework, SQL Server
 - o Clinic management system, features patient, visits, operation and finance management.
- **Hirfa Website** - HTML, CSS, Javascript, Bootstrap
 - o A company profile website
- **Raied.net Website** - C# .NET Core, HTML, CSS, Javascript, Bootstrap
 - o Company profile
 - o Registration system
- **Strela-sd.com Website** - HTML, CSS, Javascript, Bootstrap
 - o Company profile
- **CRM System for Monjid** - Node.js, Angular
 - o Staff management
 - o Order receiving
 - o Report handling
 - o Monthly checks reminders
 - o SMS integration
- **Home Care System** - Nodejs and Svelte
 - o Statistics
 - o Order management
 - o Staff management
 - o Users management
 - o Complicated Product Management
 - o Delivery Zones
 - o Coupons
 - o Complicated Pricing management
- **Order Page** - Flutter
 - o User authentication
 - o User management
 - o Products
 - o Ordering

Open Source Projects

- **flutterver**

<https://github.com/browntechnology/flutterver>

Flutter Versioning: A command line tool to manage Flutter projects versioning.

- **DockSSH**

<https://github.com/ahmedwadod/dockssh>

Dockssh, ssh into any container from anywhere with the help of redis for password storage.

- **NodeJS Docker Tutorial**

https://github.com/ahmedwadod/nodejs_docker_tutorial

A NodeJs and Docker tutorial I wrote for DEV.to community

- **mailhub**

<https://github.com/ahmedwadod/mailhub>

A simple web API to send emails from a specified SMTP email to a specified email.

Job Experiences

- **Senior Software Developer 2018 – 2019 at Maglag.com**
 - Designed management web application
 - Administered servers
 - Developed mobile apps
 - Trained interns
 - **Founder 2019 – 2020 at Josh Hosting**
 - Developed a custom Virtual Private Servers management API
 - Designed a website
 - Created a management system
 - Handled customer relations
 - **Mobile Developer 2020 – 2021 at Blueprint Technology**
 - Developed an e-commerce customer app with Flutter
 - Developed deliveryman's app with Flutter
 - Implemented Firebase services like FCM and Crashlytics
 - Worked on debugging and testing several Flutter apps
 - Developed real-time functionality with SignalR and .NET Core
 - **DevOps Engineer 2021 - 2022 at Brown Technology**
 - Administered Linux servers
 - Administered Kubernetes deployments
 - Managed the deployment of .NET Core web apps
 - Deployed Docker containers
 - Developed CI/CD pipelines
 - **Full-stack Developer 2022 - 2023 at Brown Technology**
 - Developed Mobile Apps with Flutter
 - Worked on backend projects with Flutter
 - **DevOps Engineer 2023 - 2023 at iGate KSA**
 - Managed Github Repositories
 - Managed Deployment CI/CD
 - Managed Environments
 - Deployed services
 - Automated processes
-

Certifications and Awards

- FIRST Global Challenge 2019 – Dubai, UAE – Outstanding Mentor Award
- FIRST Global Challenge 2019 – Dubai, UAE – Certificate of Excellence
- FIRST Global Challenge 2017 – Washington D.C , USA – Certificate of Excellence
- SUST AINsoc – Projects competition 2017 – First place award
- National Youth Competition 2013 – Computer section – First place award
